

FROM THE FIELD

Big Life's conservation programs fit into three distinct buckets: wildlife protection, habitat protection, and community support. We've learned that each is necessary for the success of the others, and looking at our quarterly numbers, the impact speaks for itself.

On the wildlife side, we've seen a spike in bushmeat poaching, as we always do in the dry season. Until the rains come, conflicts will be high. But Big Life's rangers arrested 25 suspects in 16 different bushmeat poaching incidents, while confiscating 434+ kg of bushmeat. They also arrested 22 suspects in 12 incidents for trophy possession, confiscated 256 kg of ivory, more than 3,263 kg of sandalwood, prevented 43 crop raids by elephants, and helped prevent 3 retaliatory lion hunts.

On the habitat side, we continue to face KiliAvo in the courts, which unsurprisingly is appealing with unrealistic hopes of resuming operations. We don't intend to let that happen, but lawyers are not cheap, and the legal expenses are mounting. But excitingly, we've entered into a new agreement with Angama as our new tourism partner in Kimana Sanctuary. The revenue that will be generated will continue to keep the sanctuary safe for years to come and is cause for celebration.

On the community side, we're now sponsoring more than 300 students with long-term education scholarships. One of our previous recipients just received her diploma in Medical Laboratory Science as well – congratulations Mary! And congratulations as well to Joan, our Community Health Program Assistant, who is the first female employee at Big Life to receive her motorbike license, which will broaden her reach in the ecosystem. It is incredible to see the culture shifting and empowering more women to do the same.

We hope you've had a chance to see our two newest films about our community rangers and our rhino protection efforts. We hope these short films inspire you to share more about our work with your networks. Times are tight for everyone, and we have not been spared – your generosity and support to keep our rangers in the field and our eyes on the horizon means more now than ever.

Thank you so much as always for your support,

Richard Bonham and Craig Millar Executive Chairman and COO - Big Life Foundation Kenya

WHERE WE WORK

Big Life Foundation's (Big Life) Area of Operation (AOO) covers approximately 1.6 million acres across the Amboseli-Tsavo-Kilimanjaro (Greater Amboseli) ecosystem in East Africa. Our team of 500+ helps to protect and secure wildlife and critical habitat stretching from the rangelands north of Amboseli to the Chyulu Hills and Tsavo West National Parks in the east, and south to Kilimanjaro National Park. The area is a central connection point for migrating wildlife and contains some of the most important habitat left in Africa. Big Life was the first organization in the region to conduct collaborative cross-border patrols between Kenya and Tanzania.

Our AOO is divided into a core area with a permanent ranger presence and regularly patrolled by mobile units, a non-core area where mobile units respond based on need and are actively covered by our intelligence network, and adjacent areas where we provide support as needed. The level of Big Life support provided varies between outposts.

Core AOO: Eselengei Group Ranch, Kimana Area, Mbirikani Group Ranch, Rombo Group Ranch, Chyulu Hills National Park, and Enduimet Wildlife Management Area (Tanzania)

Non-Core AOO: Merrueshi Ranch, Taveta Area

Adjacent*: Kuku Group Ranch, Mailua Ranch, Olgulului Group Ranch, Tsavo West National Park

^{*} Except for intel-related arrests, incidents that occurred in adjacent areas are not reflected in this report.

WILDLIFE PROTECTION

Big Life strives to prevent the poaching of all wildlife within our area of operation. We track and apprehend poachers and collaborate with local prosecutors to ensure that they are punished to the fullest extent of the law. One of the largest employers of local Maasai in the ecosystem, Big Life's community rangers are expertly trained and well-equipped to tackle a variety of wildlife crimes.

Since our inception, poaching of all animals has dramatically declined in our area of operation.

Our **2021 Q3** activity in Kenya is summarized below (Tanzania on pages 8-9):

ANTI-POACHING

Big Life employs Maasai rangers from local communities who work collaboratively with a vast informer network and a number of tools to undertake a variety of anti-poaching activities.

Total Field Staff: 450+	Rangers: 323
Ranger Units: 42	Tracker Dogs: 2
Mobile Ranger Units: 7	Permanent Outposts: 30
Aerial Surveillance Hours: 63.95	Rangers Trained: 127
Kilometers Patrolled This Quarter:	Total Kilometers Patrolled Since Inception (2011):
On foot: 23,074	On foot: 947,394
By vehicle: 138,182	By vehicle: 2,904,817
Q3 TOTAL: 161,256	TOTAL: 3,852,211
YTD TOTAL: 440,521	

WILDLIFE CRIME & ANTI-TRAFFICKING

Following the arrest of suspects by Big Life rangers, our Prosecution Officer monitors court cases to ensure that maximum penalties are pursued. Meanwhile, Big Life's intelligence team remains actively involved in investigating wildlife trafficking, both in the immediate ecosystem and beyond.

SUSPECTS ARRESTED	RECOVERED ITEMS
Poaching - Bushmeat: 25	lvory: 256 kg
Poaching Intention: 5	Animal Parts: hippo teeth (2) leopard skin (6),
Trophy Possession: 22	pangolin (1), serval skin (1), warthog teeth (9)
	Snares: 39
	Other: arrows-poisoned (4), bird traps (9),
	bushmeat (434+ kg), charcoal bags (26),
	ostrich egg (1), sandalwood (3,263+kg)
INCIDENTS	PROSECUTIONS
Bushmeat Poaching: 16	Cases - Concluded: 3
Poaching Intention: 2	Cases - Ongoing: 619 suspects
Trophy Possession: 12	

	*1 case was thrown out for lack of evidence (the skin was buffalo, not rhino as suspected)
MORTALITIES - ELEPHANT	MORTALITIES – OTHER (excluding large predators)
Human-Elephant Conflict: 1	Bushmeat Poaching: bushbuck (1), dik-dik (1),
Poaching: 0	eland (1), giraffe (4), zebra (1)
Natural Causes: 1	Other (human-related): gazelle (5), giraffe (8),
Unknown: 2	impala (2), lesser kudu (1), python (1),
	warthog (1), wildebeest (2), zebra (7)
INJURIES - ELEPHANT	RESCUES/TREATMENTS - OTHER ANIMALS
Elephants Injured: 8 (2 outside AOO)	eland (1), lion (1), ostrich (1), warthog (1),
Elephants Treated: 2	wildebeest (17), zebra (3)

RHINO INTENSIVE PROTECTION ZONE

There are **eight** known Eastern black rhinos in Big Life's area of operation. They spend most of their time in the densely-forested Chyulu Hills National Park, protected by dedicated Big Life rangers and the Kenya Wildlife Service. In addition to monitoring and protecting the resident rhinos, Big Life has been working to improve and maintain infrastructure in the rhino area, the goal of which is to maintain Intensive Protection Zone (IPZ) status, which will allow for the future inbound translocation of rhinos from other territories.

Rhino Mortalities: 0	Rhino Snares Found: 0
Rhino Protection Rangers: 59	Dedicated Rhino Outposts: 10
	Dedicated Rhino Units: 10
RHINO MONITORING	INFRASTRUCTURE
Direct Sightings: 0	Fencing: 70+ km constructed by SWT to date
Indirect Sightings (via camera trap): 17	Water Points: 3 maintained
Spoor Sightings: 30	Camera traps: 41

NOTABLE UPDATES (click to read):

- A SUITCASE OF SKINS Big Life rangers arrest traffickers with <u>6 cat skins</u>

HUMAN-WILDLIFE CONFLICT MITIGATION

Human-Wildlife Conflict (HWC) takes three primary forms across Big Life's area of operation: crops raided by wildlife, particularly elephants; livestock killed by predators, such as lions; and humans injured or killed due to living in close proximity with wildlife.

Our 2021 Q3 activity is summarized below:

HUMAN-ELEPHANT CONFLICT MITIGATION

Poaching continues to pose a significant threat, but many elephants face an even bigger challenge: conflict with humans. As the human population increases, so do competing land uses, such as farming and cattle grazing. As humans compete for limited resources like water, land, and grass for livestock, we further encroach onto what were once wild lands. With less space to share, people and animals now come into direct contact at an alarming rate and often with deadly results.

Crop-Raiding Incidents: 41 Crop-Raiding Incidents Involving Elephants: 41	Acres Damaged: 18 Acres Damaged by Elephants: 18
Crop Raids Prevented by Big Life: 43	Elephant Retaliatory Hunts Attempted: 0 Elephant Retaliatory hunts stopped: N/A
Crop-Protection Rangers: 24 Crop-Protection Fence Constructed to Date: 100 km Crop-Protection Fence Maintenance Workers: 31	Non-crop-raiding, elephant-related incidents: 10 *including water tanks/pipes damaged by elephants, boma destruction, etc.

PREDATOR PROTECTION

Big Life protects vulnerable predators in the ecosystem in collaboration with partners and local communities. The core component of Big Life's predator protection program is livestock compensation, which reduces the motivation for retaliatory killing in response to livestock depredation.

The Predator Compensation Fund (PCF) pays Maasai livestock owners a portion of the value of their livestock lost to predators, on the condition that no predators are killed in retaliation. Big Life manages the PCF on Mbirikani Group Ranch, Eselengei Group Ranch, and the Kimana Conservancy. Given the success of this program, the goal is to continue expanding the PCF across the entire ecosystem.

The second part of Big Life's predator protection program is the Maasai Olympics, which was established in 2012 as an alternative for the traditional killing of lions. At the Maasai Olympics, young warriors can compete for recognition, prove bravery, and attract girlfriends through a sports competition based on traditional warrior skills. The next games are meant to occur in December 2021, COVID-19 dependent.

Lion Mortalities: 1 Lion Mortalities in Violati	on of PCF: 0	Lion Retaliatory Hunts Prevented*: 3 * Often in collaboration with our partners at Lion Guardians and Kenya Wildlife Service.
Compensation Issued for		Livestock Killed by Predators:
60 Cows:	\$10,809 \$34,858	Cheetah: 66
632 Sheep/Goats:		Hyena: 362
2 Donkey:	<u>\$90</u>	Jackal: 174
Q3 TOTAL:	\$32,757	Leopard: 8
YTD TOTAL:	\$64,994	Lion: 74
Additional Predator Mor	calities:	Other:
Cheetah: 1 - <i>vehic</i> Hyena: 1 - <i>HWC</i>	'e	1 incidents of problematic predators moved away from bomas to avoid depredation (by chasing or translocation)

ADDITIONAL WILDLIFE CONFLICT

Humans Injured: 3	Wildlife Responsible for Injuries: buffalo (1), lion (1), hyena (1)
Humans Killed: 0	Wildlife Responsible for Deaths: N/A

- MAASAI OLYMPICS: RESCHEDULED FOR 2022

ENDUIMET WILDLIFE MANAGEMENT AREA

Many species in the Greater Amboseli ecosystem, including elephants and lions, don't observe man-made boundaries, like international borders, and as part of their endless search for food and water, wildlife regularly cross from Kenya into Tanzania. Just on the other side of the border is an important 350,000-acre Wildlife Management Area called Enduimet (EWMA).

Big Life partners with EWMA, The Nature Conservancy and other stakeholders to undertake critical cross-border wildlife protection.

Our **2021 Q3** activity in Tanzania is summarized as follows:

ANTI-POACHING & WILDLIFE PROTECTION

Big Life employs Maasai rangers from the EWMA who work collaboratively with their communities, informers, and their Kenyan counterparts to undertake a variety of wildlife protection activities.

Trained Rangers: 20	Ranger Units: 2 (mobile)
Kilometers Patrolled This Quarter:	Total Kilometers Patrolled Since Inception (Jul-2018):
On foot: 7,240	On foot: 90,163
By vehicle: 13,870	By vehicle: 168,105
Q3 TOTAL: 21,110	TOTAL: 258,268
YTD TOTAL: 68,816	
SUSPECTS ARRESTED	RECOVERED ITEMS
Community Crimes: 0	Snares: 0
Habitat Destruction: 6	Other: knives (2)
Bushmeat Poaching: 2	
INCIDENTS	Cross-Border Operations: 0
Community Crimes: 0	
Habitat Destruction: 3	Intelligence-led incident response: 3
Bushmeat Poaching: 2	

MORTALITIES – OTHER (excluding large predators)
Bushmeat Poaching: 0
Other (human-related): giraffe (1), lesser kudu
(1), gazelle (2)
OTHER OPERATIONS:
Giraffe rescued from being stuck in a tree

HUMAN-WILDLIFE CONFLICT MITIGATION

Like their Kenyan colleagues, EWMA rangers assist communities in responding to and minimizing human-wildlife conflict. This primarily takes the form of rangers chasing wildlife out of farms, confirming livestock killed by predators and assisting community members who have been injured or killed by wildlife.

Crop-Raiding Incidents: 43 Crop-Raiding Incidents Involving Elephants: 43	Acres Damaged: 62 Acres Damaged by Elephants: 62
Crop Raids Prevented by Big Life: 41	Elephant Retaliatory Hunts Attempted: 0

Livestock Killed:	By Predators:
7 Cows	Hyena: 39
41 Sheep/Goats	Leopard: 3
0 Donkeys	Lion: 6
TOTAL: 48	
Predator Mortalities:	Lion Retaliatory Hunts: 0
Hyena (2) – <i>vehicle</i>	Lion Hunts stopped: N/A

Humans Injured: 0	Wildlife Responsible for Injuries: N/A
Humans Killed: 0	Wildlife Responsible for Deaths: N/A

SECURING WILDLIFE HABITAT

The human-wildlife conflict in the ecosystem is a direct result of wildlife and local communities competing for limited resources on the same shrinking land areas. In order to reduce conflict, wildlife habitat must be strategically protected, an increasingly urgent program focus for Big Life.

Our 2021 Q3 activity is summarized below:

CONSERVANCY DEVELOPMENT

Big Life's engagement in conservancy development is composed of two specific parts. The first is paying annual leases to hundreds of owners of 60-acre parcels of land located in the Kimana Corridor. These lease payments are intended to limit destructive development of the land, other than that which is compatible with conservation and pastoralism, and made possible thanks to the Sheldrick Wildlife Trust. The second involves working with local communities to protect land that is strategically important either as wildlife movement corridors or dispersal areas, but is also valuable to the local livestock economy as a grazing resource. This protection can be achieved through the establishment of conservancies, including the legal and management systems necessary for their effective functioning, and assisting to develop income-generating opportunities such as tourism.

Kimana Sanctuary, at the easternmost part of the Kimana Corridor, was one of the first community-owned and run wildlife conservancies in East Africa. After years of mismanagement, at the request of the community, Big Life took over management in 2017. The Sanctuary is an area frequented by some of Amboseli's biggest bull elephants, and acts as an important dispersal area for many wildlife moving to and from Amboseli National Park. Thanks to support from the Sheldrick Wildlife Trust and the D.N. Batten Foundation, Big Life rangers continue to secure this special place.

Landowners benefitting from Lease fees: Kimana Sanctuary: 844 Kimana Corridor: 333	Paying visitor days: Kimana Sanctuary: 785
Infrastructure: Tourism road network: 51.3 km built to date	Other: Assisting ALOCA community to create a Land Trust; Cleaning title deed registrations; Working with partners to identify potential restoration trial sites

NOTABLE UPDATES (click to read):

• TIME TO CELEBRATE – Kimana Sanctuary gets a tourism partner - Angama

RANGELANDS MANAGEMENT

The Maasai are traditionally a pastoralist society, their wealth directly associated with their livestock. Larges herds of cows, sheep, and goats graze across the ecosystem continually. Managing the impacts of grazing on the rangelands for the overall health of the ecosystem has become a major program focus.

Our **2021 Q3** activity is summarized below: clarification

LAND

Big Life has helped to establish a sustainable farming program, the farm based at a local school, in addition to working with communities to improve livestock grazing to manage livestock movements and improve the condition of existing pasture. Rangers also actively protect the land by fighting against habitat destruction such as illegal logging or charcoaling. Lastly, we've partnered with local communities, partner NGOs, and local government to implement a <u>carbon credit program</u> in the Chyulu Hills to protect it from deforestation and overgrazing.

Suspects Arrested* for Habitat Destruction: 46	Sustainable Farms: 1
Habitat Destruction Arrest Incidents: 23	Sustainable Farming Manager: 1
*Sometimes released depending on severity of crime	
Non-Arrest Habitat Destruction Incidents: 23	Incidents of Community Grazing and Conservancy
- fire (21)	Rules Enforcement: 2

WATER

Water is one of the most precious resources in the African bush. Big Life rangers actively work to reduce illegal water extraction and ensure that river systems are free and flowing.

Total Rainfall (at HQ) This Quarter: 0 mm	Water-Related Incidents: 0
Liters of Fuel Provided for Pumping Water to Both Community and Wildlife (to reduce conflict): 600 L	Water Points Repaired: 2

COMMUNITY

Winning the hearts and minds of the community and providing a mutual benefit through conservation is the only way to protect wildlife and wild lands far into the future. To that end, Big Life provides a number of services in support of the community generally, including education and healthcare initiatives, and also lesser-known activities, such as using ranger vehicles as ambulances, arresting criminals for community crimes (e.g., theft), conducting human and/or livestock search and rescue operations, and more.

Community Crime Incidents: 5	Suspects Arrested: 7	
Human Search and Rescue Incidents: 6	Livestock Search Incidents: 4	
Other Community Support Incidents: 4 - emergency transport (3), body recovery (1)		

EDUCATION

Big Life invests in the future of participating communities by funding teachers' salaries, providing scholarship funds for local students, and implementing conservation-specific curriculum in classrooms and communities.

Our **2021 Q3** activity is summarized below:

Teachers' Salaries Paid: 4	Long-Term Student Scholarships Awarded: 326 Boys: 148 Girls: 178 One-Time Student Scholarships Awarded: 47
Tertiary-Level Graduates: 4	Students Reached by Conservation Curriculum: 1,351 School Visits: 36 Amboseli National Park Trips: 3 (75 students)

NOTABLE UPDATES (click to read):

- Emergency funding for pre-school <u>lunch</u> <u>program</u>
- GOOD OUT OF A TRAGEDY Mary graduates with a diploma in Medical Laboratory Science

HEALTHCARE

Big Life works in partnership with the Kajiado South Sub-County Department of Health to implement mobile health clinics focused on primary healthcare and family planning. Additional services provided include immunization, antenatal check-ups and HIV testing, counseling and more.

Our 2021 Q3 activity is summarized below:

Back-Pack Medical Outreaches: 54	People De-wormed: 1,769
	Immunizations Administered: 2,152
CHV Household Visits: 7,227	Family Planning Services Provided: 1,309
Family Planning Dialogue Days: 52	People Reached with Family Planning Information (& COVID prevention): 20,239

NOTABLE UPDATES (click to read):

• JOAN AND HER MOTORBIKE - Big Life's Community Health Program Assistant got her <u>motorbike</u> <u>license</u> - the first woman at Big Life to do so.

Thank you to our wonderful partners and supporters for helping make our work possible.

Together we can save wildlife and wild lands - now and for future generations.

Please consider making a life-saving donation to support the critical programs mentioned in this report. Thank you for your support
